

AXIS 215 PTZ Network Camera

*Compact pan/tilt/zoom camera for
360 degree video surveillance*

*AXIS 215 PTZ Network Camera
with pan/tilt/zoom control
over IP networks enabling
360 degree panning by unique
Auto-flip functionality.*

PAN, TILT AND ZOOM >

Effective pan, tilt and zoom including Auto-flip and E-flip functionality.

AUTO-FLIP >

Unique 360 degree pan capability, thanks to the Auto-flip functionality.

12X ZOOM >

12x optical zoom and 4x digital zoom offer a total of 48x magnification for easy monitoring of small or distant objects.

DAY & NIGHT FUNCTIONALITY >

Automatic day and night functionality with removable IR filter for increased light sensitivity.

AUDIO DETECTION ALARM >

Connected to an audio capturing device, AXIS 215 PTZ can send an alarm triggered by sound at a configurable detection level.

SIMULTANEOUS MOTION JPEG AND MPEG-4 >

Simultaneous Motion JPEG and MPEG-4 video streams allow for optimization both on image quality and bandwidth efficiency.

RELIABLE, DISCREET SURVEILLANCE

AXIS 215 PTZ is a day and night camera that offers pan/tilt/zoom control over IP networks. AXIS 215 PTZ has a compact, tamper-proof design providing protection against tampering as all moving parts are inside the casing. This versatile camera is the perfect choice for indoor environments such as shops, receptions, banks and other facilities, where you need both an overview and the possibility to zoom in for detailed inspections.

ADVANCED PTZ CONTROL

AXIS 215 PTZ enables advanced remote monitoring with pan, tilt and zoom through operator control over the IP network. With high speed and high precision movement between presets, AXIS 215 PTZ can follow a person at distance or quickly pan/tilt to a preset position. A Joystick can be used to control the PTZ movements.

AUTO-FLIP

Traditional PTZ cameras have a mechanical stop that prevents the cameras' circular movement making it impossible to follow a person walking in a full circle around the camera. Thanks to the Auto-flip functionality developed by Axis, AXIS 215 PTZ can instantly flip the camera head 180 degrees and continue to pan beyond its zero point. The camera can then continue to follow a passing person or object, regardless of the direction.

E-FLIP

When a person passes below the camera, the image will be upside-down after 90 degrees tilt. With other PTZ camera models, the operator must rotate the image 180 degrees but with the E-flip functionality, AXIS 215 PTZ can automatically flip the image electronically 180 degrees, and continue to follow the person in the correct orientation, without delay.

48X MAGNIFICATION

The total magnification capacity of 48x increases the monitoring options with the ability to show a detailed and precise view of the zoomed in area.

DAY & NIGHT FUNCTIONALITY

With automatic day/night functionality, light sensitive CCD and removable IR filter, this camera provides perfect color images when there is sufficient light, and high quality black/white video in dark conditions.

AUDIO DETECTION ALARM

The two-way audio support allows remote users not only to view but also listen in on an area, picking up unusual sounds from suspicious activity and communicating with visitors or intruders. Axis' audio enabled video products are capable of sending an alarm at a configurable audio detection level. The camera can be redirected to fixed, preset positions when there is an alarm.

SUPERIOR IMAGE QUALITY

SIMULTANEOUS MOTION JPEG AND MPEG-4

AXIS 215 PTZ offers simultaneous MPEG-4 and Motion JPEG. Video streams can be optimized for image quality and bandwidth efficiency by configuration of frame rate, resolution, compression level and format – offering up to 30 frames per second in 4CIF resolution.
